

Diamonds are (not) forever:
How **blowing stuff up** with **lasers**
can teach us about the **insides of planets**

Join us at **The Patio** in Palo Alto
on June 25 at 6 pm
as SLAC physicist and
James Bond villain in training
Emma McBride reveals her master plan

We're your friendly neighborhood national lab, bringing science to the Bay Area for over 50 years. Have a drink (no host - what'd you expect), learn about who we are and even do some science of your own.
